

CattlActive

CattlActive® is an all-natural, prebiotic drench designed for use in animals to reduce acid in the rumen during times of stress.

WHY USE CATTLEACTIVE®?

Helps balance the pH of the rumen to stimulate feed and water consumption. Helps with evacuation of harmful bacteria and microbes encountered in sale barns, calving grounds, and shipping facilities.

HOW DO I USE IT?

- › Treat orally with drench gun at processing, re-vaccination and with sick treatment protocols. CattlActive® does not contradict with any de-wormer or antibiotic.
- › Can be used on calves at birth, branding and pre-weaning stages. Also utilize on high risk calves at processing, re-vaccination and completion of preconditioning period.
- › Used on feeder cattle transitioning from growing rations, wheat pasture, or grass to higher concentrate rations.
- › Can be used to ease the symptoms of bloat by reducing acid in the rumen.
- › Cost: 1.86\$/ 10 ml dose

WHAT IS IN IT?

Corn oil, glycerin, onion extract, orange peel extract, guar gum, soybean oil, vegetable based fatty acids, and mineral water.
